PROFESSIONAL SUMMARY

Results-driven Manufacturing & Quality Engineer specializing in **Quality 4.0 transformation** within FDA-regulated environments. Proven track record of leveraging **AI-enabled analytics, Power BI, and Python** to automate compliance workflows, reducing manual analysis time by **60%** and systemic quality issues by **25%**. Expert in validation (IQ/OQ/PQ) and Lean principles, focused on converting complex industrial data into actionable operational throughput

---

CORE SKILLS

Manufacturing & Operations

Production Operations, Cleanroom Manufacturing (ISO 7/8), Process Engineering, BOM Analysis, Shop-Floor Execution, Preventive Maintenance, Fixture & Tooling Design

Quality & Compliance

Quality Assurance, Validation Support (IQ/OQ/PQ), CAPA, Non-Conformance Management, Root Cause Analysis, Change Control, ISO 9001/13485,21 CFR 820, FMEA/PFMEA, Audit Support.

Lean & Continuous Improvement

Lean Six Sigma Methodology, Waste Reduction, Bottleneck Analysis, Kaizen, Production Planning, Value Stream Mapping (VSM).

Engineering Tools & Data

Python (Pandas, NumPy), SQL, Power BI, Tableau, Power Query, Advance Excel, Generative AI, Prompt Engineering, Statistical Analysis, MATLAB, Minitab, SolidWorks, AutoCAD.

PROFESSIONAL EXPERIENCE

Manufacturing Process Engineer

Thermo Fisher Scientific – Millersburg, PA|USA ***May 2025 – April 2026***

- Applied Lean manufacturing principles and bottleneck analysis to reduce material scrap by **15%** and improve overall line throughput.
- Performed detailed Bill of Materials (BOM) verification and analysis, improving production planning accuracy and reducing material shortages **by 20%.**
- Maintained production documentation and batch records to ensure traceability and compliance.
- Streamlined documentation workflows by authoring and revising SOPs and Work Instructions (WIs), reducing training lead times for new technicians by **15%.**
- Developed **Power BI dashboards** to track real-time yield and scrap rates (**15%** reduction)
- Identify health and safety hazards, document incidents, and support CAPA implementation.
- Coordinated with Quality, Packaging, and Engineering teams to resolve line issues and meet targets.
- Applied Lean practices to reduce scrap, improve workflow, and enhance line efficiency.
- Executed Level 1 and Level 2 assembly of medical fluid systems in ISO 7 cleanrooms, ensuring 100% adherence to contamination-control and cGMP requirements.

Quality Engineer
Avanos Medical – Alpharetta, GA|USA ***Feb 2024 – May 2025***

- Led end-to-end customer complaint investigations in strict compliance with FDA QSR (21 CFR 820) and ISO 13485, maintaining a **100%** on-time closure rate for high-priority files.
- Served as Subject Matter Expert (SME) for an AI-driven quality digital transformation project with Microsoft, automating the retrieval of complaint and lot-level data to reduce manual analysis time by **60%**.
- Led the creation of a **Power BI/SharePoint tracking system**, improving team efficiency and complaint resolution speed by **20%** through real-time data visibility.
- Integrated CAPA initiation into workflows and performed statistical trending to identify recurring defects, resulting in a **25%** reduction in systemic quality issues over 12 months.
- Performed complaint trending and statistical analysis to identify recurring defects, process risks, and opportunities for improvement.
- Evaluated non-conformance reports, field actions, and escalation criteria to determine CAPA requirements.
- Prepared investigation reports and communicated findings clearly to cross-functional stakeholders including Quality Systems, Technical Quality, and Project Management.
- Supported continuous improvement initiatives by contributing data-driven insights to enhance product quality and compliance.
- Developed and delivered training on updated SOPs and quality procedures, improving team adherence to site-specific quality systems and reducing documentation errors by **20%**.
- Implementing quality management systems such as performing PFMEA, FMEA developing control plans, and leading TPM initiatives within machining operations.

Quality Assurance Engineer
Teckybot – Andhra Pradesh| India ***May 2020 – Nov 2021***

- Leveraged **SolidWorks** for design reviews and coordinated with suppliers to maintain rigorous component quality standards, managed end-to-end quality control and inspections for e-bike components, ensuring **100%** safety compliance

---

Maintenance Engineer Intern
Hindustan Coca-Cola Beverages Pvt. Ltd. – Andhra Pradesh| India ***Mar 2019 – Jul 2019***

- Assisted maintenance and production teams in day-to-day plant operations, Observed equipment maintenance activities and supported breakdown analysis

---

EDUCATION
Master of Science – Industrial Engineering |Southern Illinois University Edwardsville (SIUE), USA | **2023**
Bachelor of Science – Mechanical Engineering | K L University, India | **2021**

Projects

- **AI-Based Global Complaint Analytics Chatbot| Power BI, Compliance Reporting, Excel**
  Developed an AI chatbot for global complaint analytics and audit-ready reporting.
- **AI-Enabled Manufacturing Quality & Production Analytics | Power BI, Excel, Generative AI**
  Designed and implemented automated Power BI dashboards to analyze production output, defect trends, downtime, and yield in an FDA (21 CFR 820) and ISO-aligned manufacturing environment.
- **AI-Powered Compliance Reporting Automation| Power BI, Excel, Copilot**
  Automated manual Excel compliance reports into centralized Power BI/share point dashboards.
